NEOMATECH LIMITED

EXECUTIVE SUMMARY

1.0 Neomatech was registered in November 2008 to provide a range of professional electrical engineering services and to trade on business of general engineering, mechanical, civil, and electrical engineering projects among them fabrication, repairing and assembling, construct, build, Electrical and Mechanic Maintenance Services and public works. Neomatech is registered with Electrical Regulatory Authority and National Construction Authority.

1.1 Neomatech is dedicated to the practical application of electrical and system engineering technologies to ensure the success of our customers. Neomatech combines excellent engineers together with proven electrical engineering best practices; domain expertise and commercial technologies to create high value solutions aimed at helping our customers meet their most critical business and mission objectives. Neomatech engineers are highly specialized, bringing unmatched expertise to our customer's projects.

1.2 Our areas of expertise include but are not limited to supply and installation of: power distribution systems (utility and industrial), *Data Centre Infrastructure Implementation, industrial automation implementation, Installation of HVAC Systems, Fire Suppression Systems, 'Boiler and Steams services, IT net- work support, Project Management Services, Computer Raised floors and other Electrical and Mechanical engineering equipment.*

1.4 Neomatech has recognized industry changes and trends and has put together much diversified engineering resources to assist our utility and industrial customers with these challenges. With years of utility and industrial experience, we provide the services necessary to take projects from conception to successful execution and completion, and get them done on time and under budget. For your next project contact consider engaging Neomatech Limited.

1.5 Neomatech is focused on 3 core areas: * Enterprise Application Development, * Technology Enablement, and * Embedded Real-Time Technologies. We Provides turnkey solutions, as well as training, mentoring, and high end short and long term knowledge transfer. We work with our customers to achieve optimal solutions. Neomatech employees are recognized thought leaders within the electrical engineering community and apply that thought leadership to every assignment.

1.6 Neomatech engineers utilize their strong understanding of today's current and emerging technologies to position our clients to successfully meet their current challenges and be better prepared to address future opportunities. This is built on a set of five core values which, when taken together, guide us to consistently maintain our focus and achieve our vision.

1.7 Customer success is more than just customer satisfaction. Neomatech focuses on helping our customers meet their business objectives. We accomplish this by providing the services and solutions of highly dedicated, results-oriented, excellent engineers with the domain knowledge necessary to accomplish the task. Neomatech understands that listening to the needs of our customers and constantly communicating with them are cornerstones of problem solving.

1.8 As professional contractor in electrical and systems engineering organization, Neomatech' s excellent performance is associated with a belief that, *working closely with consultants of various trades in any project is key to successful completion of any project* .

1.9 Neomatech recognizes that we must constantly evaluate and invest in the latest emerging technologies and work to prepare our Engineering staff for the ever-dynamic nature of our business. As such, we make significant investments to ensure that our engineers are well educated, well trained and well versed in the technologies required to ensure the success of our customers. These skills are augmented by a wealth of experience and solid skills that make them well versed with technology advancement.

1.10 As a growing, successful organization, we corporate with our employees, clients, companies and organizations and evaluate on how productivity and implementation can be enhanced through teamwork spirit. We encourage and strive to find ways to support and make better the communities in which we live and work in.

1.11 We help our customers make the right initial decisions to ensure that every project is successful and cost-effective with unsurpassed quality.
